SECURE. SWIFT. VERIFIED.

CANVAS INTEGRATED

ATTENDANCE™

DIGITAL ATTENDANCE for Canvas LMS — live QR-code check-in, verified student identity, and attendance records stored directly in the Gradebook.

TRUE ATTENDANCE should not depend on paper lists, manual follow-up, or records that are easy to tamper with.

SECURE BY DESIGN. Live rotating QR code with Canvas authentication stop codes from being copied, shared, or changed after the fact.

SWIFT IN THE ROOM. Teachers launch the QR code. (Three click/tap launch). Students scan.) Three tap checkin). The session keeps moving.

VERIFIED IN CANVAS. The verified list (the sum Σ) is recorded where the course already lives: in the Canvas Gradebook, tamper-proof.

VERY HARD TO GAME = LTI 1.3 + OAUTH 2.0 + OIDC verify every check-in, buddy punching on the same device is impossible. DATA MINIMIZATION BY DESIGN.

KEY FEATURE HIGHLIGHTS

PLAN A SEMESTER. Run it ad hoc. Or a combo. Add all events to the Canvas calendar and create items ready to use, or create as you go and connect later, even re-linking after the fact. Any teaching style supported, from planned to ad hoc.

GUEST TEACHERS. Give a guest a specific link and they can take attendance — even multiple guests, each via their own link. Verified attendance without a Canvas account.

MULTI-SESSION ATTENDANCE. An intuitive editor lets you build the rules your way — group sessions, set how students qualify (by count or by percentage), and it maps to any Canvas grading scheme.

Demo, Trial or Pilot

TESTIMONIALS

VISIARC Attendance has been developed with Chalmers University of Technology since 2024 and tested in live teaching throughout 2025. Now it is released as a hardened 1.0 version, running at scale across the institution.

CHALMERS UNIVERSITY OF TECHNOLOGY is Sweden was pioneering and an active partner during product development, and is today a paying customer.

» The dynamic QR-based attendance taking is secure and hassle-free for our teachers. Verified attendance is stored directly in Canvas, exactly where we want it. I recommend moving away from manual paper-based solutions and investing in VISIARC Attendance for fast verified attendance. Full focus can be on teaching, with minimal administration."

Hugo Landgren
Educational Developer
CHALMERS UNIVERSITY OF TECHNOLOGY • SWEDEN

» We evaluated all attendance-taking products on the market, and tested the best matches. None met all our requirements. Either too complex and hard to use, not secure enough, or too easy to game. Then we found VISIARC Attendance just as we were about to build our own. It had what we were looking for, plus a couple of unique features that have proven really valuable for us. We are now running a pilot that we will expand during the school year. We like how easy and smooth it is for teachers, professors, and students. Result: no more faked attendance. Real attendance, straight into Canvas. «

THE WINNERS

Instructors launch in three clicks, with no prep. In three taps, students check in. **SWIFT**. Every check-in is **VERIFIED**. First ten minutes go to teaching and learning, not to taking attendance. No paper. No app. No follow-up. All attendance taken rests safe and **SECURE** in Canvas. Data minimization by design, in action, and at scale. The list of winners is long:

WINNER	WINS
STUDENTS	Three tap verified check-in. **ZERO FRICTION. ZERO SURVEILLANCE. NO APP.**
TEACHERS/FACULTY	Three click attendance taking. Zero friction. Zero administration. **MORE TIME FOR TEACHING.**
LMS ADMINS	Standard LTI 1.3. No new infrastructure to maintain. Tamper-proof attendance records saved into Canvas. Easy export and audit.
DPOS /DPAS	**DATA MINIMIZATION BY DESIGN.** Verified attendance. Zero location data. Simplifies DPIA. Reduces regulatory risk.
CISOS	Use existing hardened OAuth2/SSO/MFA. No network exceptions. No VPN overrides.
LEADERSHIP/ MANAGEMENT	**RISK REDUCTION.** Removes the institution from the "invasive tracking" liability category. Reduces licensing overhead.
AUDITORS	Machine-readable ledger in Canvas. Separates automated verified OAuth2 attendance data from manual overrides.
REGULATORS (EU/UKVI/HEA)	Tamper-resistant audit trail (neither teachers nor students can).Satisfies statutory funding and visa sponsor metrics.

DATA MINIMIZATION

FOR YOUR DPO:

- **DATA ADDENDUM.** Full data handling is documented in each product's data addendum, alongside our general Privacy Policy.
- **DATA FLOW.** Schematic data flowchart for Attendance.
- **DPIA.** A ready-to-adopt DATA PROTECTION IMPACT ASSESSMENT (**DPIA**), pre-populated and based on actual data flows for review, confirmation, and sign off rather than start from scratch.

THE THREE DOCUMENTS above are available on request.

Data retention

DEFINED RETENTION PERIODS. Data is deleted on schedule. Data addendum provides the detailed summary.

Data residency

LTI HOSTS IN MULTIPLE REGIONS. Your data is hosted in your jurisdiction and does not cross borders.

The data we **DO COLLECT**.

DATA	PURPOSE
USER ID	Who is present? Verified.
COURSE	Provides the context.
LIVE QR CODE	Verifies physical presence.
TIMESTAMP	Check-in record to Canvas.
LTI USER ID	Authenticates the host.
GUEST HOST	Host's name, (if invitee is used).
ERROR TRACKING	For issue investigation and debugging.

The data we **DO NOT COLLECT**.

DATA	
GPS DATA / GEOLOCATION	Not Collected
WIFI DATA / BSSID / NETWORK MAPS	Not Collected
DEVICE FINGERPRINT / HW ID	Not Collected
CELLULAR DATA	Not Collected
BLUETOOTH DATA / IBEACON	Not Collected
AUDIO / SOUND TELEMETRY	Not Collected
USAGE ANALYTICS / BEHAVIORAL TRACKING / MARKETING IDENTIFIERS	Not Collected
